

GLASSMASTER

Glass Washing Detergent

→ DESCRIPTION

A low foaming and free rinsing machine glass washing detergent for use in commercial glass washers.

→ BENEFITS

- Non-caustic and suitable for polycarbonate glassware
- Effectively removes grease and lipstick from glassware
- Contains a low foam surfactant for enhanced cleaning
- Easy rinsing
- Contains high levels of water softening agents to prevent scale forming in the dishwasher or tank
- Highly concentrated giving outstanding economy

→ APPLICATION

Glassmaster is suitable for use in all glasswashers.

→ DIRECTIONS FOR USE

MACHINE GLASSWASHER

Most glasswashers have a built in pump to dispense the detergent. Set to deliver 2.0- 3.0g/L.

OLDER GLASSWASHERS

For machines with detergent tanks, start off with a dilution of 2.0g/L and adjust if required.

In soft water areas the concentration can be reduced to around 2g/L. Your Dominant Representative or Technician can check the concentration and adjust to its optimum by measuring the pH on the glasses before rinsing. This should be around 9.5 to 10 pH.

For sensitive plastics, such as polycarbonate, do not allow concentration above 3g/L or higher than pH 10.
